RE: Experienced Full Stack Web Developer for hire

Dear Hiring Manager,

As a recent graduate from UW Coding Bootcamp with a Certificate in Full Stack Web Development, I am extremely interested in the Full Stack Web Developer, Front End Web Development and Back End Web Development opportunities. After reviewing the key qualifications for this role, I am confident that I would be a valuable contributor to company growth and success.

Through my academic journey, I applied a strong focus on building my HTML, CSS and JavaScript abilities. I am detail-oriented and meticulous when managing competing priorities within tight deadlines. I work best in roles that allow me to make a positive impact while using creative problem-solving to resolve issues and achieve goals. For any technology or languages I am unfamiliar with or do not have a great understanding yet, I can assure you that I would have no problem learning them with the skills I have learned in my coding career so far.

My academic strengths have greatly contributed to the development of my collaboration, problem-solving and motivation skills. I bring clear and effective communication to build professional connections with co-workers, management and customers. I would welcome the opportunity to further discuss the details of my experience and attributes which I believe will be an asset to your team. Please review my attached resume for additional insight into my background. Thank you for your time and consideration.

Sincerely,

Zachary Camden
